F3-Food For Fuel Program
1301 15th ST NW #425
Washington DC 20005

Dear Administrator:

I would like to take this opportunity to express our interest in the development of a partnership with Food for Fuel and its International Fitness Diplomat program. We are always seeking new and creative techniques aimed at delivering critical information to the student population. The health status of young people is reaching critical mass and supporting a kidney education program in Washington, DC public schools could dramatically help improve the health of students and assist local health officials. It will enable some of our nation's most prominent professional athletes and leading experts on nutrition to build closer ties with the National Kidney Foundation, the young people and their families and their teachers that will yield many benefits.

Selected athletes would present a comprehensive education program on behalf of F3, a 501(c)3 non-profit corporation, to promote a healthier diet by educating juveniles and early teens on effective nutrition programs to help eliminate obesity among youth. It can also create an attitude concerning dieting that ensures a healthy lifestyle and create an educational tool for future use. Lastly, it can positively impact our kidney health education program.

I understand that this potential program will be delivered to the students in the Metro D.C. area as well as across the country. I look forward to meeting you again!

Sincerely,

Preston A. Englert, Jr., CAE
President and CEO
