F3-Food For Fuel Program
1301 15th ST NW #425
Washington DC 20005

Dear Administrator:

I would like to take this opportunity to express excitement of our partnership with Food for fuel and its International Fitness Diplomat program. We are always seeking new and creative techniques at delivering critical information to the student population. We look forward to promoting your events to our members. The health status of young people is reaching critical mass and having this program in our public schools will dramatically help improve the health of students and assist the health officials. It will enable some of our nation's most prominent professional athletes and leading experts on nutrition to build closer ties with young people, their families, their teachers that will yield many benefits.

In this case, the athletes would be working on behalf of F3(non-profit group) to promote a healthier diet by educating juveniles and early teens on effective nutrition programs to help eliminate obesity among youth; create an attitude concerning dieting that ensures a healthy Lifestyle and create an educational tool for future use at several schools.

Again I can't express the excitement my staff has knowing that such a potential program will be delivered to the students across the country. We look forward to working with you about ways to promote the success of your program.
